

SEVERE WEATHER BULLETIN #10

FOR: TROPICAL DEPRESSION "CRISING" TROPICAL CYCLONE: WARNING

ISSUED AT 8:00 AM, 14 May 2021

(Valid for broadcast until the next bulletin to be issued at 11 AM today)

"CRISING" ACCELERATES WEST-NORTHWESTWARD AND IS NOW IN THE VICINITY OF LANA O DEL SUR

Hazards affecting land areas

Heavy Rainfall:

- Today, light to moderate with at times heavy rains may be experienced over Zamboanga Peninsula, Davao Oriental, Davao de Oro, Davao del Norte, Davao City, Davao del Sur, Cotabato, Maguindanao, Bukidnon, Lanao del Norte, Lanao del Sur, and Misamis Occidental.
- Under these conditions, isolated flash flooding and rain-induced landslides are possible during heavy or prolonged rainfall especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps. Adjacent or nearby areas may also experience flooding in the absence of such rainfall occurrence due to surface runoff or swelling of river channels.
- PAGASA Regional Services Divisions may issue local thunderstorm/rainfall advisories and heavy rainfall warnings while the Hydrometeorology Division and River Basin Flood Forecasting and Warning Centers may issue General Flood Advisories and Basin Flood Bulletins as appropriate.

Severe Winds:

Strong breeze conditions are likely over the localities where Tropical Cyclone Wind Signal #1 is in effect, especially in the coastal and mountainous areas of these localities.

Hazards affecting coastal waters

In the next 24 hours, under the influence of Tropical Depression "CRISING", moderate to rough seas will be experienced over the seaboard of areas under TCWS #1 (1.2 to 2.8 m). Mariners of small seacrafts are advised not to venture out over these waters. Inexperienced mariners of these vessels should avoid navigating in these conditions.

Track and Intensity Outlook

- On the forecast track, "CRISING" will continue moving westward or west northwestward and emerge over the Sulu Sea in the next 6 to 12 hours.
- This tropical depression is forecast to weaken into a remnant low within 24 hours.
